Congratulations to Our Young Champions!

The Management of Shrishti Schools warmly congratulates our students on their outstanding sporting achievements. Your hard work, determination and sportsmanship have brought pride to our school. We also appreciate the teachers, coaches and parents for their encouragement and support. May you continue to excel and reach greater heights!

Teachers' Day Celebration

3rd September was a day of gratitude and joy at Shrishti Schools, as the Matric and CBSE School Councils jointly honoured our teachers.

The celebration began with a warm welcome address by the Head Boys of both sections, who expressed sincere appreciation for the teachers' constant guidance and unwavering support.

In a delightful gesture, teachers were ceremonially crowned and presented with specially designed sashes bearing

adjectives that reflected their unique qualities, bringing smiles all around.

The stage then came alive with vibrant dance, music and instrumental performances by students, each presented with enthusiasm and affection as a tribute to their beloved teachers.

The festivities turned interactive with a fun-filled QR-code-based game, where teachers participated cheerfully, adding spark and laughter to the occasion.

The cake-cutting ceremony was a joyful highlight, followed by the distribution of cakes. As tokens of appreciation, each teacher received a gift and a sapling — symbols of knowledge, growth and lasting influence.

The programme concluded with a heartfelt Vote of Thanks by Ms. Preethi, KG Coordinator (CBSE) who thanked the management, teachers, students and School Council for making the celebration a grand success — a true expression of love and respect for those who inspire every child to dream, learn and grow.

Awareness Workshop on Healthy Food Choices

A workshop on "Awareness of Food Intake and Balanced Diet" was conducted for the students of Class 9 at the Manu Makhija Auditorium on 25 September 2026 by Ms. L. Kasthuri from food safety department. The session aimed to create awareness among students about making healthy and informed food choices in their daily lives.

The workshop focused on understanding the importance of monitoring the intake of salt, fats, sugar and carbohydrates. Students were encouraged to become more mindful of the ingredients present in commonly consumed foods and to understand how excessive intake of these components can affect overall well-being.

The session also highlighted the importance of having a balanced diet that includes a variety of nutritious foods in the right proportions. Through simple explanations and practical examples, students learnt how healthy eating habits can contribute to better growth, energy, concentration and overall wellness. The interactive workshop encouraged students to develop responsible eating habits and make healthier choices for a stronger and healthier future.

Nurturing Competence, Inspiring Learning

Shrishti Schools, Vellore, organised an Orientation Program for Teachers on the topic "Outcome-Based Teaching and Competency-Based Teaching" on 10 September 2026, led by Mr. Ramprabakar, Educational Consultant and Advanced Certified Counsellor.

The enriching session invited teachers to look beyond content delivery and focus on meaningful learning, measurable outcomes and authentic competency development. It explored the Cognitive, Affective and Psychomotor domains

and emphasised that knowledge forms the foundation upon which competency is built through application, judgement and performance.

Through the Intention–Evidence–Action cycle, teachers reflected on designing purposeful learning experiences, gathering evidence of learning, providing timely feedback and responding to learners' needs. The session also highlighted the use of clear, observable action verbs to frame effective learning outcomes.

The programme culminated in a renewed commitment to creating thoughtful, engaging and learner-centred classrooms, where knowledge is not merely acquired but transformed into understanding, application and competent action.

Little Radhas and Krishnas – A Joyful Krishna Jayanti Celebration

Our Kindergarten children celebrated Krishna Jayanti with great joy, enthusiasm and devotion. The little ones looked absolutely adorable as they dressed up as Radha and Krishna, bringing the festive spirit to life with their colourful traditional attire, beautiful accessories and charming smiles.

Adding to the celebration, our young Radhas and Krishnas participated in a delightful ramp walk. They confidently

walked the ramp, striking different poses and showcasing their adorable expressions. Their cheerful participation filled the atmosphere with excitement and made the event a memorable one for everyone.

The celebrations continued with the much-loved traditional Uri Adi, where the little Krishnas enthusiastically participated and showcased their energy and festive spirit. Their innocent smiles, lively movements

and joyful enthusiasm captivated the audience.

The celebration provided our children with a wonderful opportunity to learn about and experience the rich cultural traditions and values associated with Lord Krishna and Krishna Jayanti. It also encouraged confidence, creativity, participation and a sense of togetherness among our young learners.

SILVER ZONE OLYMPIAD

Our school hosted the International Computer Science Olympiad (ICSO), organised by the Silver Zone Foundation, on 24 September 2026. The Olympiad offered students of Class 3 to 9 and 11 a stimulating platform to incorporate their knowledge of Computer Science, logical reasoning, and problem-solving to the test.

With enthusiasm and confidence, students embraced the challenge, demonstrating their ability to think logically, analyse situations, and apply concepts beyond the confines of the classroom.

Beyond being a competitive examination, the Olympiad encouraged curiosity, critical thinking, accuracy, and a spirit of healthy competition. It was a rewarding experience that inspired

students to explore the ever-evolving world of technology with greater interest and confidence.

The ICSO Silver Zone Olympiad was indeed a meaningful step towards nurturing the analytical and technological minds of tomorrow.

Imagination Meets Discovery

The Inter-House Activities for Grades I to III provided young learners with exciting opportunities to imagine, express and explore. "Dear Future Me – Time Travel Letters" encouraged students to travel into the future through their imagination and write heartfelt letters about their dreams, favourite things, goals and aspirations. The activity nurtured creative expression, self-awareness and communication skills.

The Mystery Box Explorer added an element of curiosity and sensory discovery. Students used their sense of touch to identify mystery objects and describe their textures as rough, smooth or soft.

This engaging activity strengthened observation, thinking, identification and sensory skills.

Together, these activities made learning joyful and meaningful, inspiring children to dream boldly, think creatively and discover the world around them with curiosity.

Little Chefs, Big Adventures - Fruit Salad Making Activity (25 September 2026)

Our little chefs stepped into the exciting world of culinary creativity on Little Chef Day, celebrated with a vibrant and joyful Fruit Salad Making Activity. The Kindergarten classrooms came alive with colourful fruits, cheerful smiles and enthusiastic young learners eager to discover the joys of healthy food.

The children explored a variety of fresh fruits and enjoyed identifying their colours, shapes, textures and flavours. With the loving guidance of their teachers, they participated in preparing a delicious and

nutritious fruit salad. Each little chef had the opportunity to learn through doing, while practising important skills such as following instructions, mixing, sharing and working cooperatively with friends.

The activity was not only about making a tasty treat but also about developing essential fine motor skills, independence, confidence and teamwork. The children were delighted to see their colourful creation come together and were even more excited to taste the healthy fruit salad they had prepared.

A Learning Experience to Savour

The Fruit Salad Making Activity transformed learning into a fun and meaningful hands-on experience. It helped our young learners understand the importance of healthy eating and making nutritious food choices, while nurturing practical life skills and a spirit of cooperation.

With colourful fruits, curious minds and plenty of enthusiasm, our little chefs truly made the day healthy, happy and unforgettable!

INTERHOUSE ACTIVITY

To commemorate "World Rivers Day," our school organised an engaging Inter-House Activity (IHA) for students of Grade 6 to 8 on 25 September 2026, centred on the theme "History of Rivers" – Narration on this topic in Tamil.

The activity provided students with an opportunity to explore the rich history, significance, and cultural heritage associated with India's rivers.

Representatives from each House presented thoughtfully prepared narrations

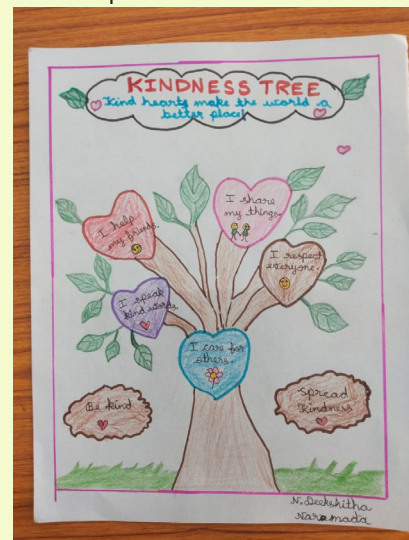

in Tamil, highlighting the origin, uses, and cultural importance of rivers such as the Ganga, Kaveri, Yamuna and Narmada.

The students spoke with confidence and fluency, bringing alive the timeless relationship between rivers, civilisation, and human life.

The event was a meaningful celebration of rivers and a reminder that protecting our rivers is protecting our future.

Growing Kindness, Building Innovation

The Inter-House Activities for Grades IV and V offered students, two meaningful opportunities to create, collaborate and think beyond the classroom. The "Kindness Tree Celebration" encouraged students to express appreciation, compassion and good deeds through thoughtful messages, which were creatively brought together to form a beautiful Kindness Tree. The activity nurtured empathy, kindness and creative expression.

The Recycled Bridge Challenge then turned newspapers and tape into an exciting engineering adventure. Working in House teams, students planned, designed and built bridges within a given time, exploring concepts of strength, balance and stability. Through these activities, students developed creativity, teamwork, problem-solving and critical-thinking skills, proving that learning can be both purposeful and fun.

Enhancing Knowledge about AI and Exploring AI Tools

An insightful Orientation Programme on “Enhancing Knowledge about AI and Exploring AI Tools” was conducted for the students of Std. XII on 26th September.

The session was graced by Mr. Swami as the Chief Guest. He enlightened the students with in-depth knowledge on the effective use of AI, the art of crafting precise prompts, and how AI can serve as a powerful guide in shaping their future careers.

The session was highly informative and interactive, inspiring students to embrace AI as a tool for learning, innovation and career growth.

Inter-House Games

The spirit of sportsmanship and healthy competition came alive at Shrishti Matric as the Inter-House Games were enthusiastically conducted from 21st to 25th September for the students of Std. VI to IX and XI.

A wide array of events including Football, Basketball, Kabaddi, Throwball, Volleyball, Table Tennis and Badminton were organized. Students from all four houses participated with great zeal, energy and team spirit, showcasing their talent, determination and true sportsman spirit on the field.

The week-long fiesta not only fostered physical fitness but also instilled values of teamwork, discipline and camaraderie among students.

ECINET Club Formation and Awareness Meeting

An ECINET awareness meeting was conducted on 21 September 2026 (Monday) at the Collectorate, Vellore, with the objective of creating awareness about the election process and facilitating the formation of ECINET Clubs in schools.

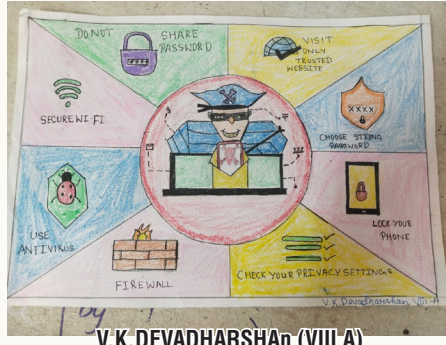

The meeting provided detailed information about the various electoral forms, namely Form 6, Form 6A, Form 7, and Form 8, and explained their respective purposes in the voter registration and electoral process.

Rishitha, accompanied by a teacher, attended the meeting from 4:00 p.m. to 5:30 p.m.

The session helped the participants understand the electoral process and the role of ECINET Clubs in promoting voter awareness, electoral literacy, and responsible participation among students and citizens.

A Teacher's Love

You taught us more than words can say,
You showed us how to find our way.
With every lesson, every smile,
You made the journey worth the while.

You saw the dreams we couldn't see,
And helped us become who we could be.

When we were lost, you held our hand,
And helped us learn to understand.

Your words may fade with passing years,
But your kindness stays through joys and tears.

A teacher's love is quiet and true,
A little part of us will always belong to you.

We may leave your classroom someday,
And walk along a different way,
But wherever life may take us to,
We'll always remember and love you.

- SELVAKUMARI.M (XI C)

Powering a Brighter Tomorrow

How Renewable Energy Is Changing Our World ?

Clean, renewable energy from solar panels and wind turbines is no longer just an idea for the future—it is becoming a reality. Around the world, renewable energy is expanding rapidly and transforming the way we produce and use electricity. Countries such as China are making major investments in solar and wind power, helping accelerate the shift towards cleaner energy. Renewable energy can reduce pollution, create new jobs and technologies, and help build a more sustainable future. This change is a reminder that protecting our planet is not only a responsibility for governments and scientists. Small actions, smart choices and innovative ideas can all contribute to a greener tomorrow.

"Renewable energy isn't just powering today—it's protecting tomorrow."

- JAIDEV. S (VIII B)

A New Day

Every morning brings a chance,
To learn, to grow, to dream, to dance.
With books in hand and hope inside,
We walk ahead with hearts so wide.
We may make mistakes along the way,
But every mistake teaches us each day.
With friends beside us, we laugh and learn,
And face each challenge at every turn.
So let us dream and do our best,
Believe in ourselves and forget the rest.
For every new day gives us a way,
To learn something new and shine our way.

छोटी-सी हँसी

सुबह-सुबह अलार्म बजा,
नींद ने मुझसे कहा, "रुक जा!"
आँखें बोलीं, "थोड़ी देर,"
बिस्तर बोला, "यहीं है सवेरा!"
किताबें मेज़ पर मुस्काती रहीं,
कॉपी के पन्ने मुझे बुलाते रहे।
मैंने सोचा, "पहले थोड़ा आराम,"
और घड़ी ने कर दिया अपना काम!
जब स्कूल जाने का समय हुआ,
तब मेरी सपना पूरा हुआ।
नींद गई और मैं भी भागा,
जूता पहना उल्टा, फिर भी हँसता भागा!

- HEMALATHA. V (VIII B)

உழைப்பின் வெற்றி

விழுந்தாலும் எழுந்திடு,
விடாமுயற்சியோடு நடந்திடு..
தோல்வி வந்து தடுத்தாலும்,
துணிவோடு அதை கடந்திடு!

வியர்வை சிந்தும் ஒவ்வொரு
துளியும்,
வெற்றிக்கான விதையாகும்..
இன்று நீ சிந்தும் உழைப்பெல்லாம்,
நாளை உன் உயர்வாகும்!

வழிகள் கடினமாக இருந்தாலும்,
வாழ்க்கை நின்றுவிடாது..
முயற்சியை நீ தொடர்ந்தால்,
முடியாதது எதுவுமில்லை!

அதிர்ஷ்டம் கதவைத் திறக்கலாம்,
ஆனால் உழைப்பே வெற்றியைத்
தரும்..

கனவு காண்பது மட்டும் போதாது,
கனவுக்காக உழைத்திட வேண்டும்!

"உழைப்பு இருக்கும் இடத்தில்
உயர்வு நிச்சயம்!"

- PANIMALAR (XI C)

STAR OF THE MONTH

SEPTEMBER 2026

SELVAKUMARI R
Class - XI C

Selvakumari excels in dance and singing, possesses excellent handwriting. She is an athlete and also actively participates in all extracurricular activities. Additionally, she is an academic topper.

Congratulations!

The Power of Education

Have you ever thought about how education can change our lives? Education is very important for everyone. It gives us knowledge and helps us understand the world around us. Education teaches us to read, write, think, and make good decisions. It helps us discover our talents and achieve our dreams. A good education also teaches us values like honesty, kindness, respect, and responsibility. Teachers play an important role in our education. They guide us, encourage us, and help us become better people. Today, technology also helps us learn through computers, smart classes, and online lessons. Education is not only about getting good marks. It is about learning new things and becoming a better person. As Nelson Mandela said, "Education is the most powerful weapon which you can use to change the world." Education gives us confidence and helps us face challenges in life. It can bring positive changes to our families, society, and country.

Kindergarten

The Student Who Taught Me

Every teacher enters a classroom believing that they are there to teach. But after years of standing before young minds, I have discovered a beautiful secret:

Sometimes, the student is the teacher.

I remember a student who rarely spoke in class. Whenever I asked a question, the student would look down, hoping not to be noticed. Written work was incomplete, answers were hesitant, and confidence seemed to be missing.

It would have been easy to think, "This child is not interested."

But I decided to look beyond the marks.

One day, instead of asking the student to answer a difficult question, I asked, "What do you think?"

There was silence.

Then came a very soft answer.

It wasn't a perfect answer. The grammar was not perfect either. But there was an idea—a genuine idea.

So I smiled and said, *"That's interesting. Tell me more."*

The student looked surprised.

Perhaps it was the first time someone had valued the thought before correcting the language.

Slowly, things changed.

The student began answering questions. Then came small conversations. Later came reading aloud. One day, that same student stood before the class and spoke confidently.

The class applauded.

I did too.

But that day, I realised something important: I had not taught that student confidence. I had simply given confidence a place to grow.

Teachers often worry about completing portions, correcting notebooks, preparing worksheets, conducting assessments, and improving marks. These things matter. But somewhere between the timetable and the textbook, we must remember the person sitting before us.

A child is not a mark.

A child is not a rank.

A child is not a comparison.

A child is a possibility.

Every classroom contains students who are waiting for someone to notice their hidden talent. One may be a brilliant writer but a poor speaker. Another may struggle with grammar but create wonderful art. Someone may be quiet in class but possess extraordinary imagination.

Our job is not to make every student the same.

Our job is to help every student discover what makes them unique.

English, especially, gives us a wonderful opportunity to do this. A story can give a shy child a voice. A poem can give words to an emotion. A debate can build courage. A book can introduce a student to worlds they have never seen.

And sometimes, a simple sentence from a teacher can stay with a student for years:

"I believe you can do it."

As teachers, we may never know how far our words travel.

Years from now, our students may forget the grammar rules we taught them. They may forget the poems they memorised and the answers they wrote in examinations.

But they may remember the teacher who listened.

The teacher who did not give up.

The teacher who saw potential when they could not see it themselves.

That is why I no longer believe that teaching is a one-way journey. Every morning, I walk into my classroom carrying lessons to teach. And every afternoon, I walk out carrying lessons I have learned.

I entered the profession to teach students English. But my students taught me the language of patience, empathy, courage and hope. Perhaps that is the most beautiful lesson of all.
